Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Relevant content and good balance of practical (live coding) to theoretical parts.

Based on the course evaluation result - which are the weaknesses of the course?

Nothing stands out from the evaluations.

Comments about the collaboration with the course ambassadors

The work with the ambassador (there was one) was very good, but at the same time there was not much required to be done here as the course went very smooth.

Conclusion and suggestions for course development or already made decisions

One comment suggested more material on GIT, this is in line with the official changes in the course for the next instance, so GIT will be more integrated in the course contents.

Other comments

I would like to thank all the students for participating in the course, interesting final projects, and answering the course evaluation.
