Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The overall grade of the course seems good. Stated as positive is the amount, the group projects and the application of theory into real projects.

Based on the course evaluation result - which are the weaknesses of the course?

The division of people into groups by course teachers received criticism. However, in previous courses this has been stated as positive. In this case it seems to be more about supporting students views on how projects are progressing.

Comments about the collaboration with the course ambassadors

Worked well. No special issues were raised and was not needed either since the whole class was very communicative and constructive.

Conclusion and suggestions for course development or already made decisions

See weaknesses. Based on the course set-up it seems that it is good per se, but it is more about supporting students in how progression takes place and to take countermeasures towards lack of commitment and progression.
