Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Course contents, lab topics, the form of the lectures.

Based on the course evaluation result - which are the weaknesses of the course?

There were split opinions about the difficulty of the exam, Jersey library API for Java was difficult to handle.

Comments about the collaboration with the course ambassadors

There were no volunteers for ambassadoring, at this stage students tend to ask and provide direct feedback to the teacher (and there was not much of it this year).

Conclusion and suggestions for course development or already made decisions

A better library for REST API programming with Java should be recommended with appropriate pointers (to avoid getting swamped in the Jersey library) for the next time.

Other comments

I would like to thank all the students for active participation in the course (this should be put into the context of most of the lectures being scheduled at 8:15), doing things on time (which was particularly important for me this year), and for answering the course evaluation. /Wojciech
