Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The course is perceived as well-designed and effective in supporting achievement of the learning outcomes (80–82%). Students particularly valued the clear and engaging lectures, interactive labs, practical assignments, and the project-based approach linking client–server and database concepts. The teacher was frequently highlighted as supportive, inspiring, and pedagogically strong. The AI-powered TA also received positive feedback.

Based on the course evaluation result - which are the weaknesses of the course?

The main weaknesses relate to assessment and workload. Several students felt the exam duration was too short, given the shift to more written questions, and some perceived the grading thresholds as demanding. Students also noted a high overall workload and occasional difficulties interpreting lab checker feedback.

Comments about the collaboration with the course ambassadors

No students volunteered to act as course ambassadors during this course offering.

Conclusion and suggestions for course development or already made decisions

Overall satisfaction is high (79%), indicating a well-functioning course. Future improvements should focus on reviewing exam duration, format, and grading thresholds, as well as balancing the workload. Strengths in teaching approach and project design should be maintained.

Other comments

Thanks to all students who participated in the course evaluation and shared their valuable feedback and suggestions. The response rate of 40% provides a reasonable basis for understanding the student experience. According to the results, the overall course satisfaction index was 79%, an improvement of almost 10% from the previous year. This indicates a generally positive perception of the course and suggests that recent efforts to improve its design and delivery have been effective.

I am overall satisfied with the course.
