

DT8051 (Python - a Gateway to Machine Learning, HT 2025, Ortsoberoende, Halmstad, 13118, H3118, X3118)

Number of possible respondents: 64

Answers: 23

Response rate: 35,94 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The students have been generally satisfied with the lectures, exercise sessions, and lab assignments.

Based on the course evaluation result - which are the weaknesses of the course?

Some questions in the exercise sessions have been too difficult and need to be revised to be more constructive. The final exam, while appropriate, focused a little too much on one of the topics.

Comments about the collaboration with the course ambassadors

Two course ambassadors volunteered, and they provided their feedback to the course responsible close to the end of the course.

Conclusion and suggestions for course development or already made decisions

Some exercises should be revised. There should be more effort to examine students on all their knowledge and skills with less focus on specific parts of the course.
