Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

I appreciate the constructive feedback from all participants. It really encourages us to hear that many of you enjoyed the lectures, found them engaging, and appreciated the course's structure, content, and practical components. This was my first year taking on the course responsibility and it means a lot to hear that the course went well overall and most students were satisfied with the education they received. This year, I used interactive tools like Kahoot competitions to make the sessions more engaging and to motivate everyone to participate actively.

Based on the course evaluation result - which are the weaknesses of the course?

The course has a few areas that can be improved. We received valuable suggestions regarding the course page and documentation, as some essential information—particularly about assignments, grading, and datasets—was not always clearly presented or easily accessible. In addition, there were some challenges with the school servers that affected the smooth execution of the labs. These issues will be addressed to improve clarity, accessibility, and the overall learning experience in future iterations of the course.

Comments about the collaboration with the course ambassadors

Very positive and constructive in both directions.

Conclusion and suggestions for course development or already made decisions

We will work on enhancing the course page and documentation to ensure that all essential information especially regarding assignments, grading, and datasets is available. We faced some challenges with the school servers, which is understandable as both students and staff continue to adapt to the systems. We recognize these challenges as important points, and we will aim to reduce them, provide clearer guidance, and more timely feedback in future iterations.

Other comments

Thank you again for your engagement and valuable insights. they help us continuously improve the learning experience. I will make sure to go through all feedback once more before the next round of the course.

I am overall satisfied with the course.

	Number of responses	Distribution (%)	Index (%) I am overall satisfied with the course	78
