

IK8015 (Design Studio in Digital Service Innovation, HT 2025, Halmstad, H3703, X3703)

Number of possible respondents: 18

Answers: 8

Response rate: 44,44 %

Study pace: 100 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

1. Hands-on projects where students practice designing emerging technologies such as AI wearables.
2. Sufficient and adaptive support from mentors for project work.
3. Workshops where students can propose topics of interest.
4. The opportunity to build on students' work from the research placement course and create tangible design prototypes.

Based on the course evaluation result - which are the weaknesses of the course?

1. Students need more lectures and practical examples of how Research through Design can be applied, especially when balancing knowledge generation and design deliverables when collaborating with industry.
2. Introducing some structured checkpoints could help students with project management.
3. Students need more instructions on the expectations of supervisions and oral exams (e.g., what /how to prepare).

Comments about the collaboration with the course ambassadors

Conclusion and suggestions for course development or already made decisions

The course received very positive evaluations. One thing for reflection is whether Research through Design is the most appropriate approach in this course, or if additional design methods could be introduced.
