### Examinators kursanalys

#### Vilka styrkor har kursen?

All areas received high grades, but especially with respect to examinations moments and “studiemiljö” (90% and 91%). From the open-text answers: the teaching/lectures/pedagogy and labs were appreciated (some very nice comments here...), followed by SI-classes, the diversity of material for learning (recordings, tasks, exercise classes, “tentagenomgångar” etc.).

#### Vilka svagheter har kursen?

Pedagogy/lecture structure (no red thread), not enough moments in the labs, not enough preparation for the labs, that the lab instructions were not stapled into a booklet. The discipline in the classroom was not upheld – “disrespectful” disruptive behaviour, talking during lectures, arriving late/leaving early was allowed uncontrolled.

#### Kommentera samarbetet med kursambassadörerna

“Programambassadors were recruited instead of course-specific ones. The meeting with those was positive, with comments describing mainly how much the “kompletteringsintervjuer” for students that only just failed an ordinarietenta had a chance to gain credit to go over the pass mark were appreciated. Aside, we had regular dialogue before/after lectures and exercise classes, which are also valuable.

#### Slutsatser samt eventuella förslag till kursutveckling eller beslut som redan fattats

The final evaluation looks good. I am humbled by some of the praise received for the teaching, and this shows that – although I won’t be able to “please” everyone – there are some who appreciate my effort. I’m delighted that the extra chance of interview was appreciated and I will continue this. Small details, such as stapling lab instructions, I can fix easily (supply a stapler in the lab?). The poor discipline of some students did not go unnoticed. I will seek advice on how to deal directly with this in a mutually respectful way, as it does ruin the experience for other students. I will look into the possibility of other lab experiments – maybe “open”, optional labs which students can run in the lead-up to exam periods (when the labs are not heavily booked up!). SI passes are popular, and I will try to ensure these continue. I have no doubt we can recruit quality SI-ledare from this cohort.

#### Övriga kommentarer

A pleasant cohort of engaged, talented students. I enjoyed teaching the course, and it’s good to see that most (of those who responded) enjoyed taking it. Thank you for filling in this questionnaire and helping me refine this course even more.

The response rate was about 38%, which is quite low. This is overall lower than the rate of attendance to lectures (50-60%) so I think it is reasonable to draw conclusions from this.

Finally, make sure you fill out the correct course evaluation for the correct course – I had comments which were clearly meant for other courses/teachers.
