Examinators kursanalys

Vilka styrkor har kursen?

The course has good teachers and a structure which allows students to engage with the course material at their own pace. The material is delivered at a reasonable level to students for whom the material is new and unfamiliar. The multiple-choice test layout helped with engagement and self-check over progress. The project work was clearly described and had interesting topics in which to work.

Vilka svagheter har kursen?

The seminars should probably have more examination based on the "in-seminar" discussions and oral presentation of ideas as opposed to the handing-in assignment associated with the moments. There was not enough attention placed on the water cycle to justify the course name. The course doesn't cater for every student - some perceived it to be too hard, some too easy, for some were lectures too fast, for some too slow. That the course doesn't match everyone's expectation is a weakness...maybe...but a challenge which is very difficult to meet.

Kommentera samarbetet med kursambassadörerna

We did not successfully recruit course ambassadors despite many attempts to do so. This has been a recurring problem with first-cycle classes and a problem which has our attention. I enable, however, constant dialogue with students through information meetings, where they have a forum to address questions and problems directly with me as a whole class. I find that this is usually very successful.

Slutsatser samt eventuella förslag till kursutveckling eller beslut som redan fattats

Seminar structure and topics could well be changed to promote better in-seminar engagement and take up other questions related to the water cycle. The project work section can be developed more with some newer topics. The multiple choice tests and seminar problems will be reviewed with a view to meeting challenges presented by AI/ChatGPT which mean that the answers can be just found and recited, but the questions and answers need to be neither understood nor retained. A general, distracting and unfortunate blight on higher education, unfortunately.

Övriga kommentarer

I thank the students for the comments from the course evaluation and from our continuous dialogue during the course. I really appreciate the time you took to answer the survey and raise issues as and when appropriate so I can maximise your engagement with the course.

Jag är sammantaget nöjd med kursen.
