

MX8019 (Societal Challenges and Nature Based Solutions, HT 2025, Halmstad, H0356)

Number of possible respondents: 16

Answers: 11

Response rate: 68,75 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Several students have responded positively to the contents of the course, especially the possibilities to practice scientific writing and develop small projects & carry them out. Students have lifted the course as providing good opportunities to practice both methods and writing ahead of thesis work.

Based on the course evaluation result - which are the weaknesses of the course?

Weaknesses can be summarized as: 1) Not being cohesive enough, i.e., having several parts which do not connect well. 2) Course literature is lacking and perhaps also being more basic than it should be on this level. 3) The assignments were not well spaced in time, giving rise to stress situations (as there is also a parallel course to consider).

Comments about the collaboration with the course ambassadors

Students have continuously given feedback via Blackboard and at lectures, thus making any issues known early on - which we teachers appreciate.

Conclusion and suggestions for course development or already made decisions

For next time, a revision of literature is needed along with a discussion of the 'red thread' within the course. Further, the number of assignments is likely good, but timing should be looked into.
